

Safe KZN Live — Report Module Documentation

Community Platform

Access the live community platform: [KZN-Guard](#)

Project Overview

Safe KZN Live is a South African AI-powered community safety and emergency response platform designed to improve public safety, emergency communication, and crime awareness in Durban and surrounding areas.

Purpose of the Report Module

The reporting system enables communities to report crimes, emergencies, suspicious activities, floods, fires, roadblocks, and missing persons in real time.

Main Objectives

- Enable fast emergency reporting
- Improve real-time communication
- Increase community awareness
- Support emergency responders
- Strengthen neighborhood safety coordination

Supported Incident Types

- Robbery
- Hijacking
- Assault
- Fires
- Floods
- Medical emergencies
- Missing persons
- Suspicious activities

Reporting Process

1. Open the report page
2. Select incident type
3. Add incident details

4. Capture GPS location
5. Upload evidence
6. Submit report

Emergency SOS Features

- One-tap emergency activation
- Silent SOS mode
- Voice emergency trigger
- Emergency tracking ID
- Live location sharing

AI-Powered Features

- Crime hotspot detection
- Fake report detection
- Risk analysis
- Dangerous area prediction
- Incident prioritization

Live Safety Map

The platform displays crime hotspots, active emergencies, nearby hospitals, police stations, roadblocks, flood zones, and safe areas in real time.

Supported Durban Areas

- Umlazi
- KwaMashu
- Chatsworth
- Phoenix
- Pinetown
- Ntuzuma
- Bluff
- Wentworth
- Isipingo
- Durban North

Security Features

- Encrypted reports
- Role-based access control

- Two-factor authentication
- Secure admin dashboard
- User verification system

Languages Supported

- English
- isiZulu
- isiXhosa

Technical Stack

- Base44
- Firebase Authentication
- Firebase Realtime Database
- Google Maps API / Mapbox
- GPS tracking
- Push notifications

Future Improvements

- AI facial recognition
- Municipality partnerships
- Smart CCTV integration
- Wearable panic devices
- National expansion across South Africa

Conclusion

Safe KZN Live is a community-driven emergency communication platform designed to improve safety, awareness, and emergency response through technology, AI, GPS tracking, and real-time communication.

Safety Indicators

Color	Meaning
Red	Dangerous
Yellow	Warning
Green	Safe
